# MARKET WAS HEAVY IN UNCERTAIN WAY

Wheat Market Caused Anxiety and Turkish Situation Renewed Uneasiness.

NEW YORK, April 16 .- Speculative interest in stocks flagged to-day and the tone of the market was heavy in an uncertain way. The depression was not pronounced until the final dealings, and had little that was posi-

was not prenounced until the final dealings, and had little that was positive to account for it. That there was notable decreasing in the buying operations was palpable, and this, rather than any notable growth in the supply of stocks for sale, was accountable for the dropping tendency of prices.

Some of the stocks which helped to sustain the market by their notable advances resterday were subjected to sales to realize profits to-day, and thus helped on the depression.

The position in the wheat market was the occasion of some anxiety and renewed uncasiness over the Turkish situation was another dominating factor. The extension of the speculation in wheat has sharpened the sense of the stock market tradition that parallel buil speculations in stocks and grains present an anomaly, the rule being for contrary price movements in the two markets. A number of announcements of important new bond transactions was a feature of the day. These bond hotations and others, believed to be in prospect, are held to give promise of measures of support for the stock market, such as are supposed to facilitate the marketings of new bond issues. On the other hand, bond subscriptions at such a rate are likely to make an impression on the money market with possibly unfavorable effect on stocks.

It was not until the renewed bulge in wheat late in the day that the weakness of stocks developed. Prices broke them with some violence, making last prices the lowest of the day.

Bonds were irregular. Sales, par value, \$5,896,000.

United Siaces bonds were unchanged on call.

COTTON MARKETS.

NEW YORK, April 16.—The cotton market was very nervous and unsettled to-day with prices reacting after the recent sensational advance. The close was steady in tone, but at a net decline of 14@17 points. The market opened steady at unchanged prices to a decline of \$0 points in response to disappointing cables, and soon soid off to not decline of 14@17 points under heavy realizing and operations for a reaction, which were encouraged by easier late cables, reports that interior markets had been selling spots very freely in advance and the absence of aggressive support from buil leaders. There was pretty good buying on a scale down, and during the early atternoon prices railied several points from the lowest, but did not get closer than 6 or 5 points of last night's closing, and the market later weak-need again under selling by early buyers, who were disappointed over the absence of increased support from the bull leaders, which they had expected in time to influence Liverpool to-morrow. Prices closed at practically the lowest point. Southern spot markets officially reported early were unchanged to itc. higher. Frivate advices received during the day were generally builting as to spot conditions, representing that the interior was assking higher prices on account for a slightly increased movement. The weather may show an officially reported early were unchanged to the first provided that the second of the first proposed to account for a slightly increased movement. The weather may show of no further precipitation in the Southwest but Texas mail advices indicate that the shouters of Tuesday were beneficial in central sections of the State. There was some COTTON MARKETS.

DRY GOODS MARKET NEW YORK, April 16,—The dry goods market for jobbing trade was very quiet to-day. Buvers in the market are looking for day, Buyers in the market are looking for match-up garments, millinery, etc., but are paying little attention to piece goods. The primary cotton goods market is strong, but buyers are unable to induce sales to meet contract prices tendered. Cotton yarns are higher. A large auction sales of carpets is announced to take place April 29.

Steamer Aurora, Craddock, Fetersburg, merchandise and passengers, Phillips Line, On the York, April 16.—R. G. Dun & Co.'s weekly review of trade to-morrow will say:
Although the movement of trade is slow, it is of large volume and steadily in the direction of improvement. In iron and steel the structural lines continue to reflect a broader demand. One encouraging feature is the increased interest shown in pig fron.
Improvement in the since market is quiet. The hide market is quiet, but prices are firm. In the primary market for cotton goods the effect of the recent heavy export business to China is apparent, many mills having turned over their machinery wholly or in part to the production of these goods. While most of the business taken thus far has been for the 3.50 sheetings, considerable inquiry has been reported of late for lighter weights, a development which, should orders actually be placed, will still further strengthen the domestic market. In the print cloth yarn division converters can no longer consider propositions for late delivery, and in some instances a premium for nearby goods has been paid. In narrow gravs printers have operated more liberally, but business on staple prints has not greatly improved. Prices of cotton yarns are irregular, with little improvement in the volume of business.
